

3. Purpose of use:	4. Place of use:	Section	Township	Range	Base and Meridian	Acres
Recreational						
Stockwatering						
Fish and Wildlife Enhancement	At Reservoir Site within NW $\frac{1}{4}$ of SE $\frac{1}{4}$	29	13N	9W	MD	
	NE $\frac{1}{4}$ of SW $\frac{1}{4}$	29	13N	9W	MD	
Irrigation	NE $\frac{1}{4}$ of SW $\frac{1}{4}$	29	13N	9W	MD	10

The place of use is shown on map on file with the State Water Resources Control Board.

5. The water appropriated shall be limited to the quantity which can be beneficially used and shall not exceed 29 acre-feet per annum to be collected from November 1 of each year to April 14 of the succeeding year. The maximum withdrawal in any one year shall not exceed 5 acre-feet. (0000005)

This permit does not authorize collection of water to storage outside of the specified season to offset evaporation and seepage losses or for any other purpose. (000005I)

6. The amount authorized for appropriation may be reduced in the license if investigation warrants. (0000006)

7. Complete application of the water to the authorized use shall be made by December 31, 2006. (0000009)

8. Progress reports shall be submitted promptly by permittee when requested by the State Water Resources Control Board until a license is issued. (0000010)

9. Permittee shall allow representatives of the State Water Resources Control Board and other parties, as may be authorized from time to time by said Board, reasonable access to project works to determine compliance with the terms of this permit. (0000011)

10. Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce

return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest; and is necessary to preserve or restore the uses protected by the public trust. (0000012)

11. The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the State Water Resources Control Board if, after notice to the permittee and an opportunity for hearing, the Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the Board finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges. (0000013)

12. Permittee, when required by the State Water Resources Control Board, shall install and maintain an outlet pipe of adequate capacity in the dam as near as practicable to the bottom of the natural stream channel, or provide other means satisfactory to the Board, in order that water entering the reservoir which is not authorized for appropriation under this permit can be released. Permittee shall submit plans and specifications of the outlet pipe or alternative facility to the Chief of the Division of Water Rights for approval within six months of the date upon which the Board issues notice that an outlet is required. Permittee shall furnish evidence which substantiates that the outlet pipe or alternative facility has been installed in the dam. Evidence shall include photographs showing completed works or certification by a registered Civil or Agricultural Engineer. (0050044)

13. Reservoir areas currently accessible to wildlife shall not be fenced or otherwise modified so as to prevent wildlife from utilizing the reservoir. (0400500)

14. Permittee shall comply with the following provisions which are derived from the contract between permittee and Yolo County Flood Control and Water Conservation District executed on November 5, 1996 and filed with the State Water Resources Control Board:

(1) If during the period from September 1 of any year through April 30 of the succeeding year, either (a) the elevation of Clear Lake has reached 7.56 feet as measured on the Rumsey Gage or (b) water has been discharged from Clear Lake to hold the water level down in compliance with the Gopcevic Decree, water collected to storage during permittee's corresponding diversion season shall be water appropriated under this permit. If during such period from September 1 through April 30, either (a) or (b) above does not occur, water collected in permittee's reservoir(s) shall be purchased from the Yolo County Flood Control and Water Conservation District.

(2) Permittee shall install and maintain in the reservoir(s) an accurate direct reading staff gage, calibrated to storage in acre-feet, which is referenced to a permanent bench mark. Permittee shall supply the staff gage reading on or about October 1 of each year to the Yolo County Flood Control and Water Conservation District and to the State Water Resources Control Board with permittee's report of annual water use.

(3) Permittee shall allow a designated representative of the Yolo County Flood Control and Water Conservation District reasonable access to the reservoir(s) for the purpose of determining water levels.

Inclusion in this permit of certain provisions of the referenced contract shall not be construed as disapproval of other provisions of the contract or as affecting the enforceability, as between the parties, of such other provisions insofar as they are not inconsistent with the terms of this permit. (010D001)

This permit is issued and permittee takes it subject to the following provisions of the Water Code:

Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1391. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

Dated: **AUGUST 18 1998**

STATE WATER RESOURCES CONTROL BOARD

for *David R. Beeving*
Chief, Division of Water Rights
